FACULTY OF ENGINEERING, ALEXANDRIA UNIVERSITY

1 Introduction

Connect-Four is a popular game. The winner is the one who can space more four discs of the same color adjacently -either in a vertical, horizontal, or even a diagonal row- than his opponent.

For more informations about the game [Connect 4](#).

This game is developed by the C programming language.

Important Links:

- The full source code [GitHub](#).
- The Game [Demo](#) on youtube.

2 Features

-The player can select the Top X Players, the width and the height of the game using the XML file.

-The player is free to choose between two game modes -Human Vs Human OR Human Vs Computer- .

-Vs Computer mode was upgraded to be more difficult

-An Algorithm for the computer (personal effort) was implemented to make a progress and stop the player from making a progress.

-The player can save up to 3 games whenever he want.

-Undo and Redo the player moves.

-Displaying the player rank.

3 Design Overview

- *The structure of the game is almost all about arrays , for example The Board Is a 2D character array .*

-

- *In files And dealing with it , we saved in binary files.*

-

- *Nearly all the functions is made using arrays also.*

-

- *We tried to make separate functions each to perform a specific task.*

4 Assumptions

[1]In case of game loading:

-if the loaded file was corrupted or not found, Ask the player to select another file.

[2]In case of a tie in vs human mode:

-ask the two players to insert their names.

[3]In case of a vs computer mode:

-ask the player to insert his name whatever the result is.

[4]In case of XML file corruption:

-set the default values.

5 Data Structure

-Board array

-player structure

-configuration structure

-Column free spaces array

-position array

-turn array

6 Important Functions

-Undo and Redo

-Save and Load

-Check score

-Check free spaces

-Check winner

-player move

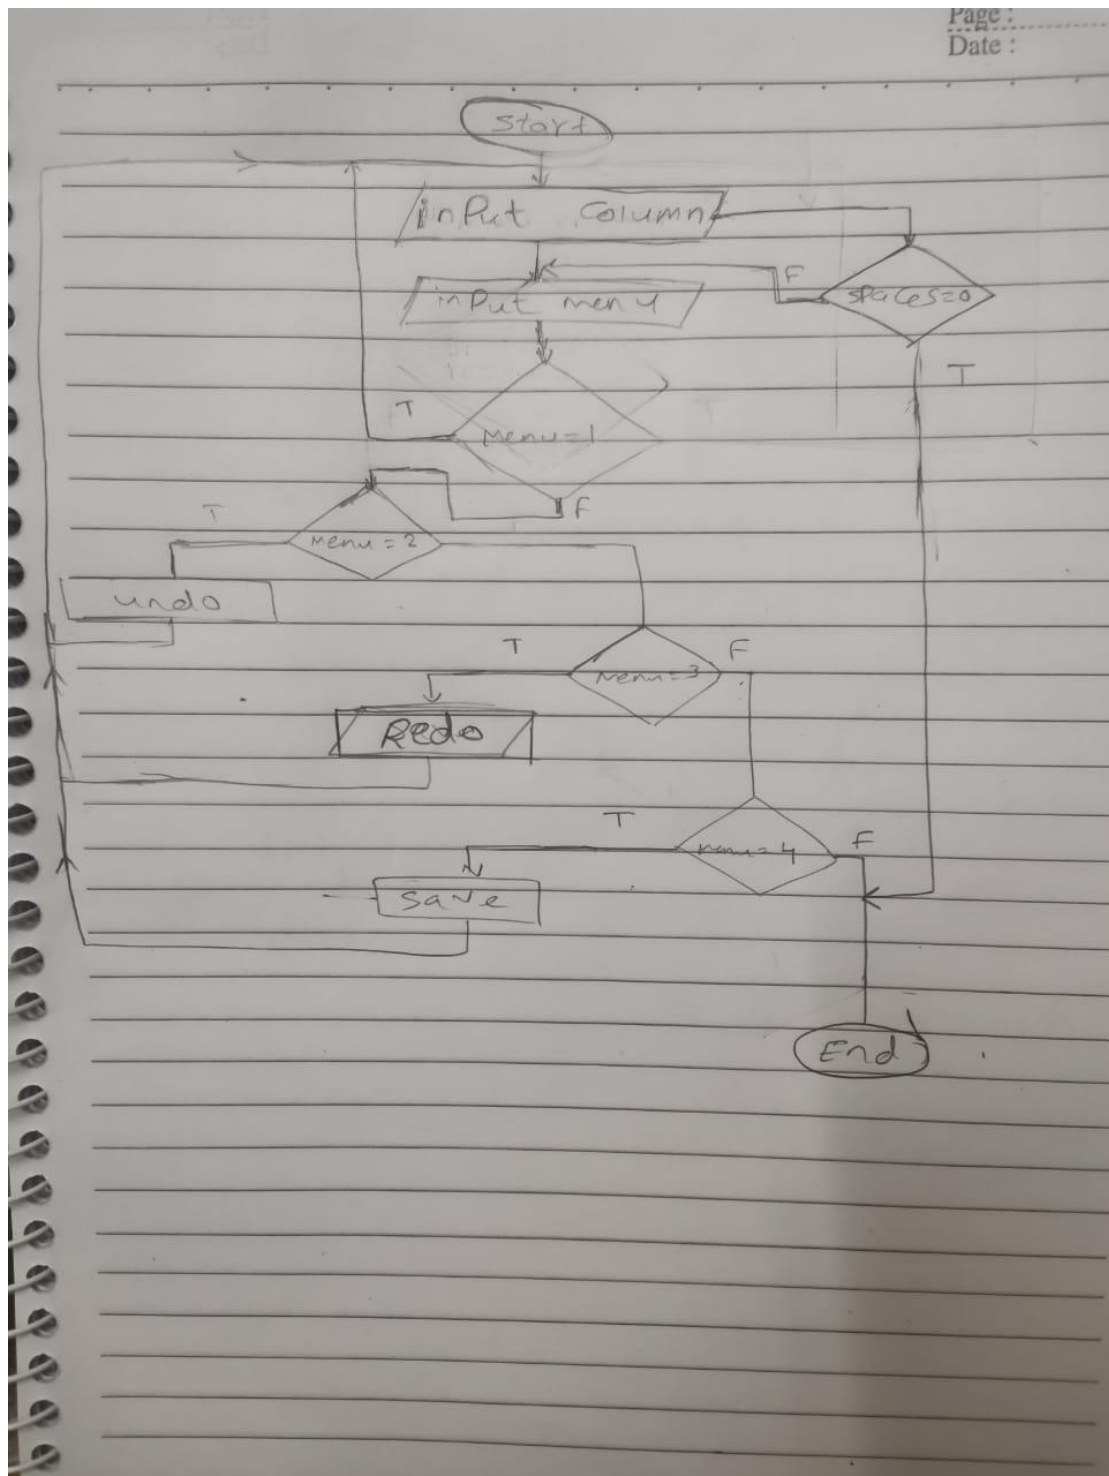

-computer move

-print board

-xml

-Top players

6 – flow chart

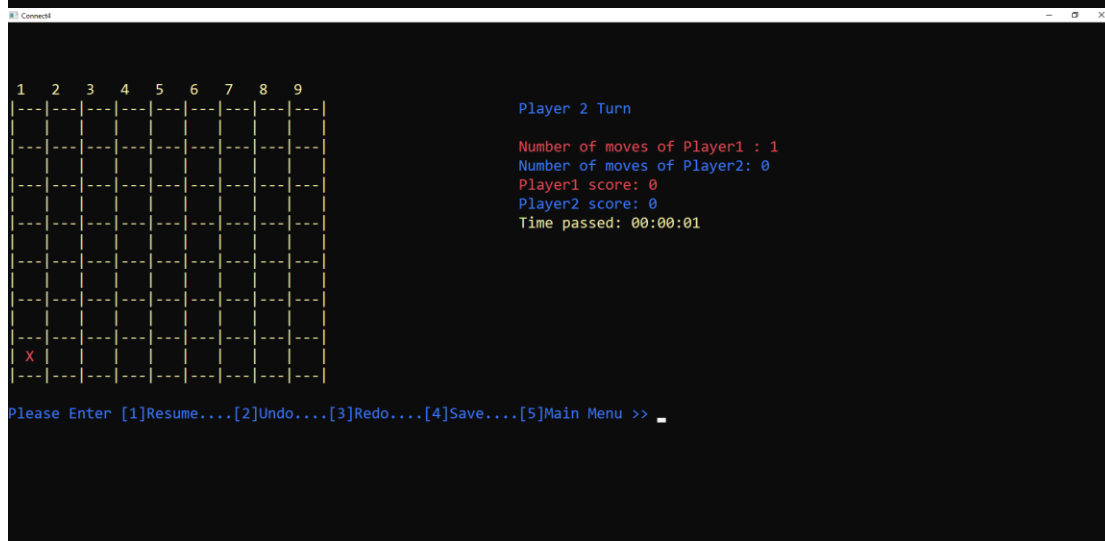

7 User Manual

- First you'll enter the main menu , there are 5 choices you can choose one : the first is to enter a new game and this has to options ; against the computer or (AI) or against your friend using the same keyboard .
- Second is to load saved games you have saved before using the in-game menu while you are playing.
- Third choice is to see the top scores of the games played before
- Forth is the credit where you know some information about the game and who made it .
- Fifth and last exit the game if you want to quit it.
- The Idea Of the game is to put 4 consecutive symbols of yours to earn points , every consecutive 4 symbols you get a point and by the time the board is full , the winner is the player whose score is more.

8 Sample Runs

"D:\CSED Game\Connect-4\Connect4\bin\Debug\Connect4.exe"

```
[1]- Ahmed Ashraf With Score 2
[2]- Muhammed Ali With Score 2
[3]- Khaled Mustafa With Score 2
[4]- Ammar Yasser With Score 2
[5]- Mustafa With Score 2
[6]- Khaled With Score 2
[7]- Amgad Khaled With Score 2
[8]- Omar Ali With Score 2
[9]- Ahmed With Score 2
[10]- Omar Zaki With Score 2

Please Enter [1] To Go To Main Menu 2
Wrong Entry , Please Enter [1] To Go To Main Menu
```
